

PA CONSENT

This facility has on staff a physician assistant to assist in the delivery of medical care.

A physician assistant is not a doctor. A physician assistant is a graduate of a certified training program and is licensed by the state board. Under the supervision of a physician, a physician assistant can diagnose, treat and monitor common acute and chronic diseases as well as provide health maintenance care.

“Supervision” does not require the constant physical presence of a supervising physician, but rather overseeing the activities of and accepting responsibility for the medical services provided.

A physician assistant may provide such medical services that are within his/her education, training and experience. These services may include:

- Obtaining histories and performing physical exams
- Ordering and/or performing diagnostic and therapeutic procedures
- Formulation a working diagnosis
- Developing and implementing a treatment plan
- Monitoring the effectiveness of therapeutic interventions
- Performing minor surgeries
- Offering counseling and education
- Supplying sample medications and writing prescriptions (where allowed by law)
- Performing cosmetic procedures: dermal fillers, Botox, Dysport, Jeuveau, PRP injections
- Making appropriate referrals

I have read the above, and hereby consent to the services of a physician assistant for my health care needs.

I understand that at any time I can refuse to see the physician assistant and request to see a physician.
